King Wine Cellar has been in the field of metal wine cellar customization for 16 years and is a leader in China's metal wine cellar innovation. The brand is committed to the use of metal to restore the original European and American wine storage environment. On the basis of retaining the original characteristics, it continues to innovate and optimize to improve the visual sense and user experience of the wine cabinet.

King wine cabinet inherits the excellent essence of wine cabinet design in the old world of France, Italy and Spain, and inherits the art; it integrates the fresh joy of wine cabinets in Australia, Chile, the United States, and South Africa.

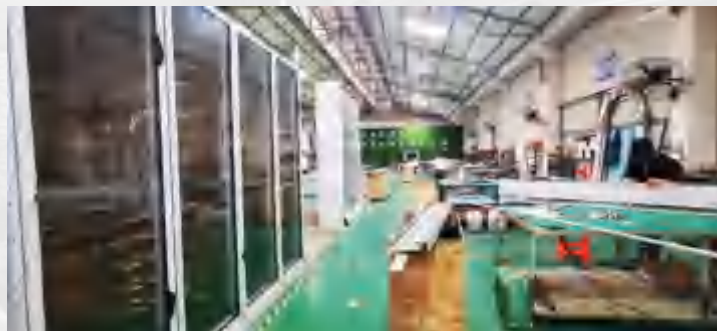

King Wine Cabinet can design for our customers or take designs from customers and manufacture for them. We are committed to create modern and long life high end wine cellars for our customer.

## Factory introduction ▶▶▶ FACTORY INTRODUCTION

---

King Wine Cellar Company is equipped with 3,500 watt laser cutting and shearing, Plate folding, pit planing, laser welding and other fine processing equipment, and deployed 12 army masters of high-end metal products for 12 to 23 years, and strive to make improved stainless steel wine cabinet. King Wine Cabinet Factory has a total area of 2,000 square meters. In addition to various wine cabinet production equipment, it is also equipped with a luxurious exhibition hall for customers to experience. Here you can experience and compare room temperature cabinets, constant temperature cabinets, wine cellars or sake cabinets, wine cabinets and liquor cabinets. Our well experienced engineer team can also outsource different material other than stainless steel to make a perfect combination of materials to meet the extreme requirement of designers.

meters.

Introduction: The owner is a  
local real estate developer  
and has very high  
requirements for product  
details.

# Hong Kong Victoria Villa Project

---

H O N G   K O N G

## Project information

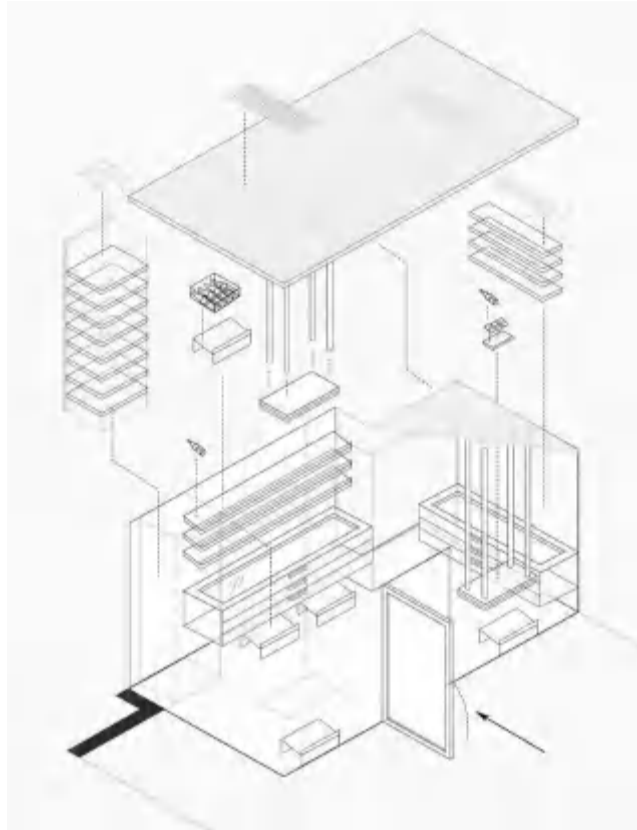

This walk-in wine cellar is peacefully packed with fine wines and cigars. Hong Kong Victoria on the top of the 88-story building Doria Port is part of a three-story apartment with a spacious 360-degree panoramic view, a semi-built skyline and a semi-natural hillside.

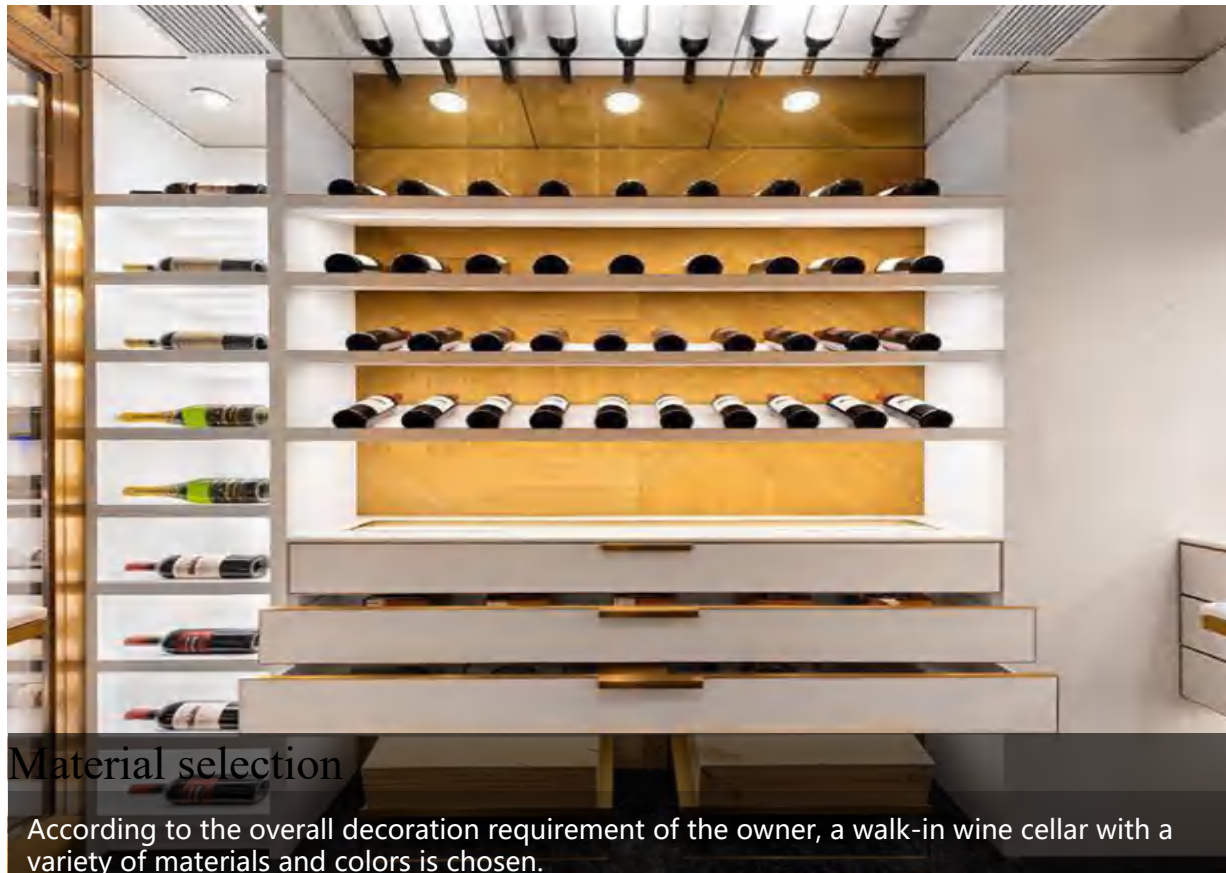

Address: Hong Kong,  
China Area:

Approximately 5.3 m<sup>2</sup>

Material: metal, natural  
oak, marble

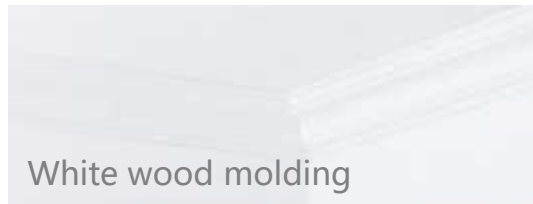

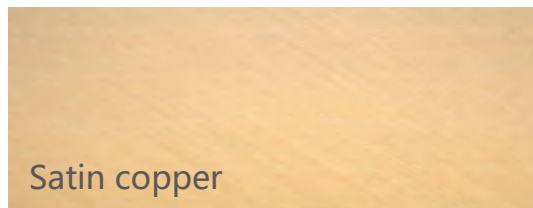

### Material selection

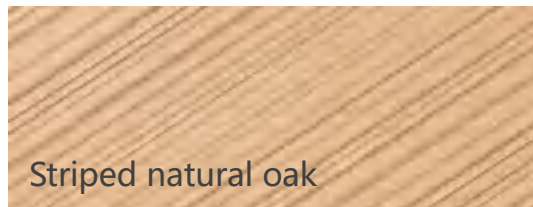

According to the overall decoration requirement of the owner, a walk-in wine cellar with a variety of materials and colors is chosen.

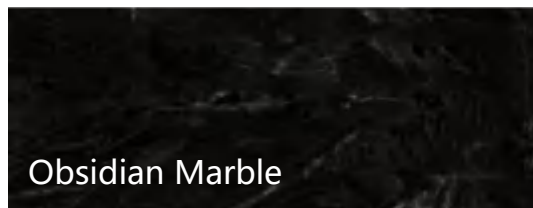

White wood molding

Satin copper

Striped natural oak

Obsidian Marble

With a capacity of 221 bottles + 24 humidors, there is a visual interaction between highly controlled geometric shapes and natural component patterns.

A photograph of a wine cellar. The image is split into four quadrants by a central vertical opening. The top and bottom quadrants show a dark, textured surface, possibly a cave or a vaulted ceiling. The left and right quadrants show rows of wooden wine racks filled with dark wine bottles. A semi-transparent white horizontal band runs across the middle of the image, containing the title and a red underline.

# Macau Private Villa Project

MACAO

### Project information

This private wine cellar is located on a winding hillside road, running in its architectural and geographical environment. The villa has a total of twelve residential units, with panoramic views overlooking the metropolis. The natural slate enhances the fusion of the wine cellar to the mountain.

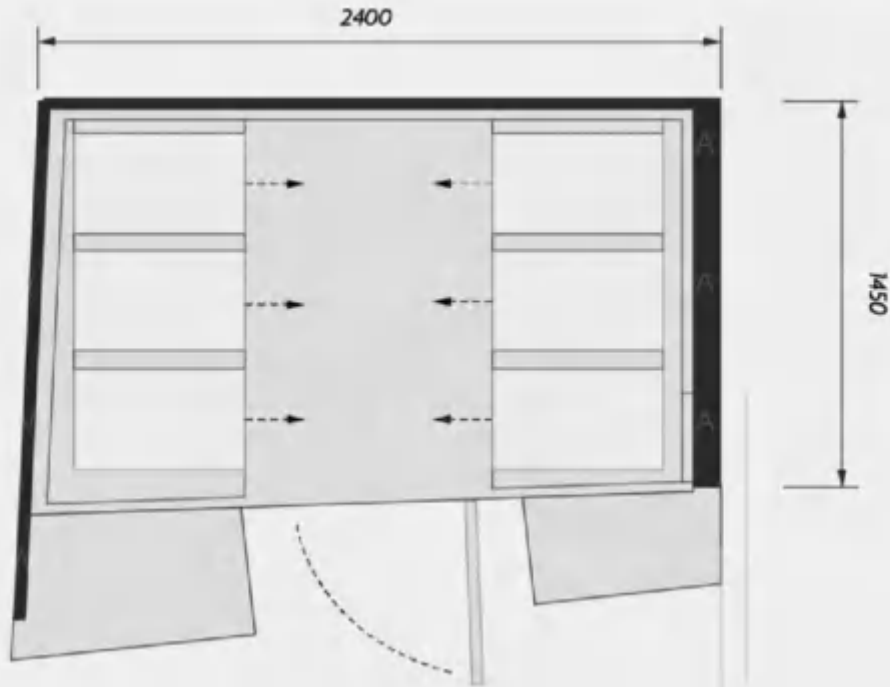

Address: Macau, China

Area: Approximately 3.5 m<sup>2</sup>

Material: metal, slate stone, mahogany, oak

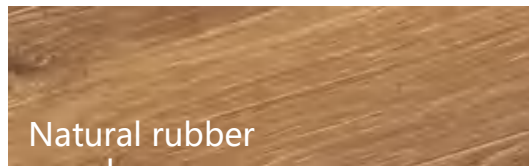

Plan view

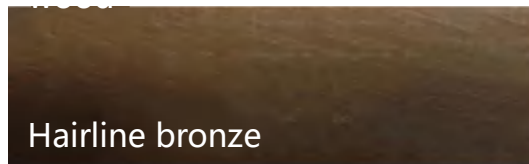

### Shelf design

The cabinet body is equipped with multiple pull-out shelves, and multiple box storage areas are set at the same time, which makes the space that cannot be placed more reasonable.

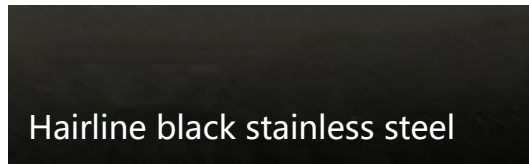

Natural rubber  
wood

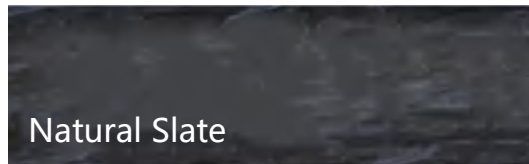

Hairline bronze

Coffee walnut

Hairline black stainless steel

Natural Slate

The image is a collage. The background consists of several panels. On the left and right sides, there are close-up views of wine bottles lying horizontally on wooden shelves, illuminated by warm, recessed lighting. The central panel shows a perspective view down a long, narrow aisle in a wine cellar, with dark wooden racks on both sides and a grid-patterned ceiling with recessed lights. A semi-transparent grey horizontal bar is overlaid across the center of the image, containing the main title and a red line.

## Constant Temperature Wine Cellar Project for Macau Owners

M A C A O

[www.kingwinecellars.com](http://www.kingwinecellars.com)

### Project information

The apartment has its own 6 square meters hotel and kitchen area, located in the middle of the apartment courtyard. The owner is a collector of wine, and she hopes that this place can be used as her personal collection environment. Therefore, the designer has strengthened the movement of the wine cellar space to provide a good walk-in operation experience.

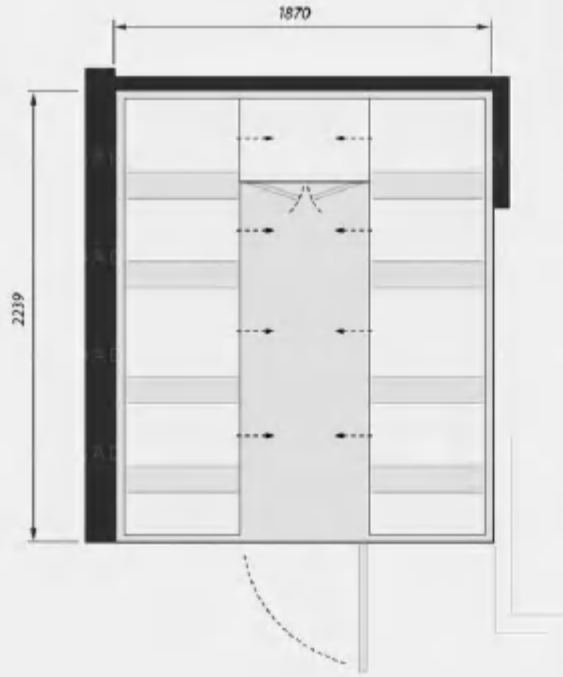

Address: Macau, China

Area: about 6 m<sup>2</sup>

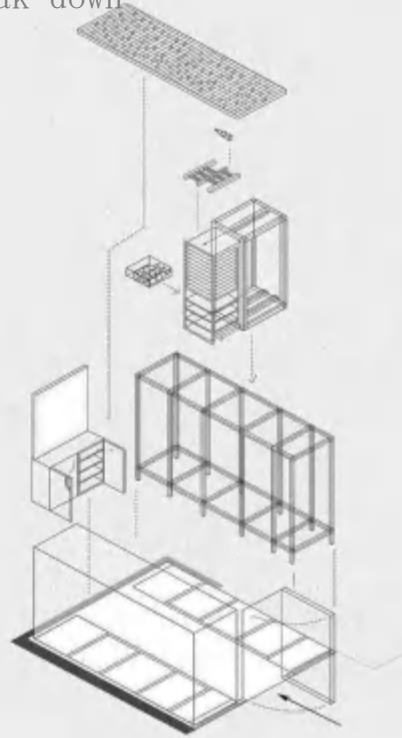

Material: Metal, Mocha Oak

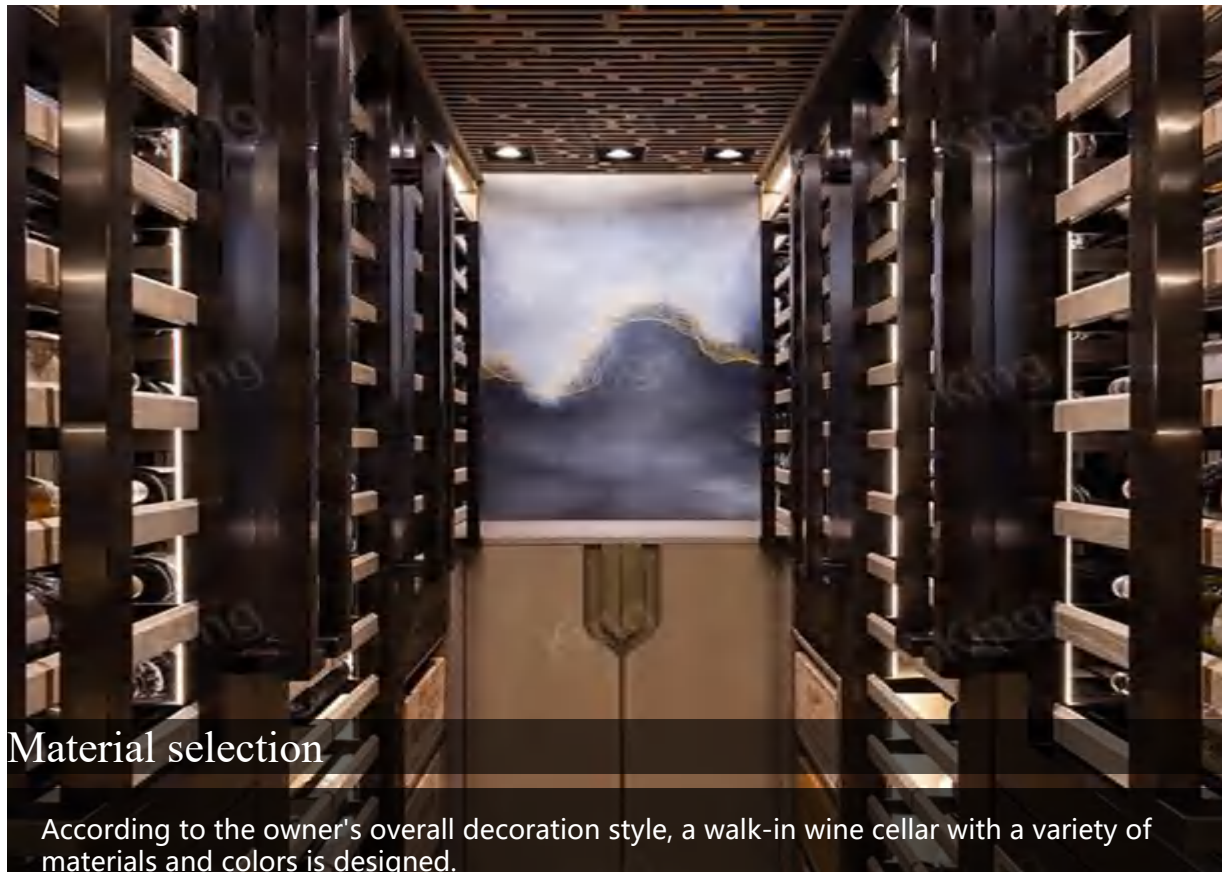

Floor plan

Break down

## Material selection

According to the owner's overall decoration style, a walk-in wine cellar with a variety of materials and colors is designed.

sandblasted nickel silver

Beige marble

Mocha Oak

Hairline black stainless steel

Product Highlights

Auxiliary traction wall

Sliding partition

Easy-to-access box load

Large format display

## Hong Kong Mandarin Oriental Hotel Suite Project

---

H O N G      K O N G

### Project information

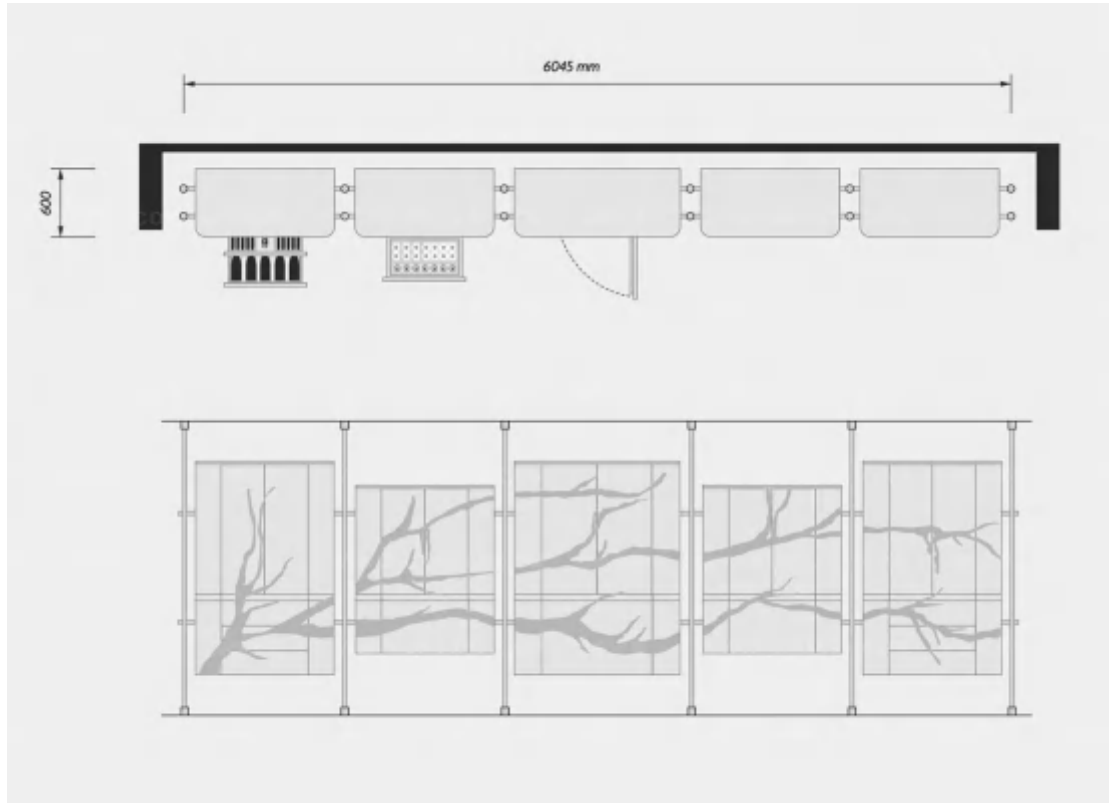

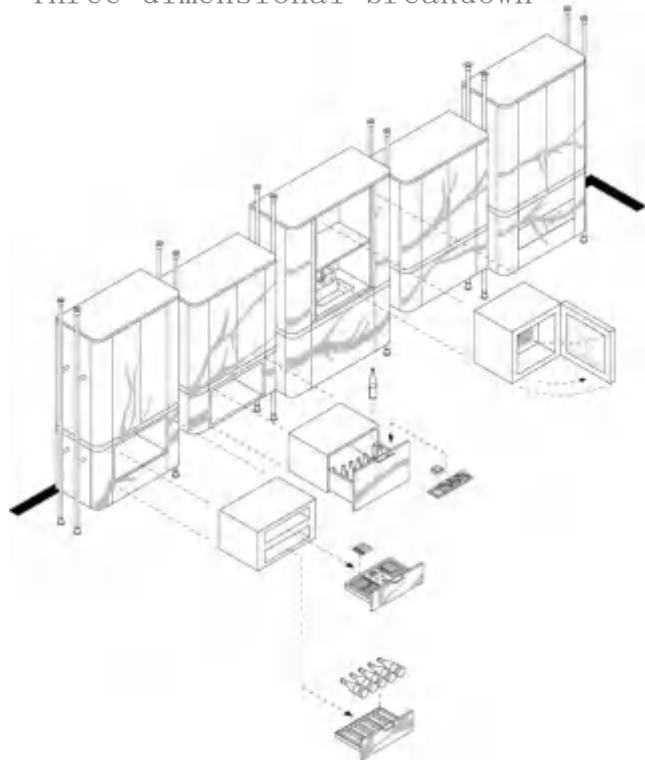

This project is located in the new entertainment suite of The Landmark Mandarin Oriental Hotel, Hong Kong. This huge entertainment venue is dedicated to providing the most unique fun. The cabinet is equipped with a Cuban cigar box, rare wine drawers, a bartender drawer for fresh herbs and a glass cabinet filled with Michelin-starred delicacies.

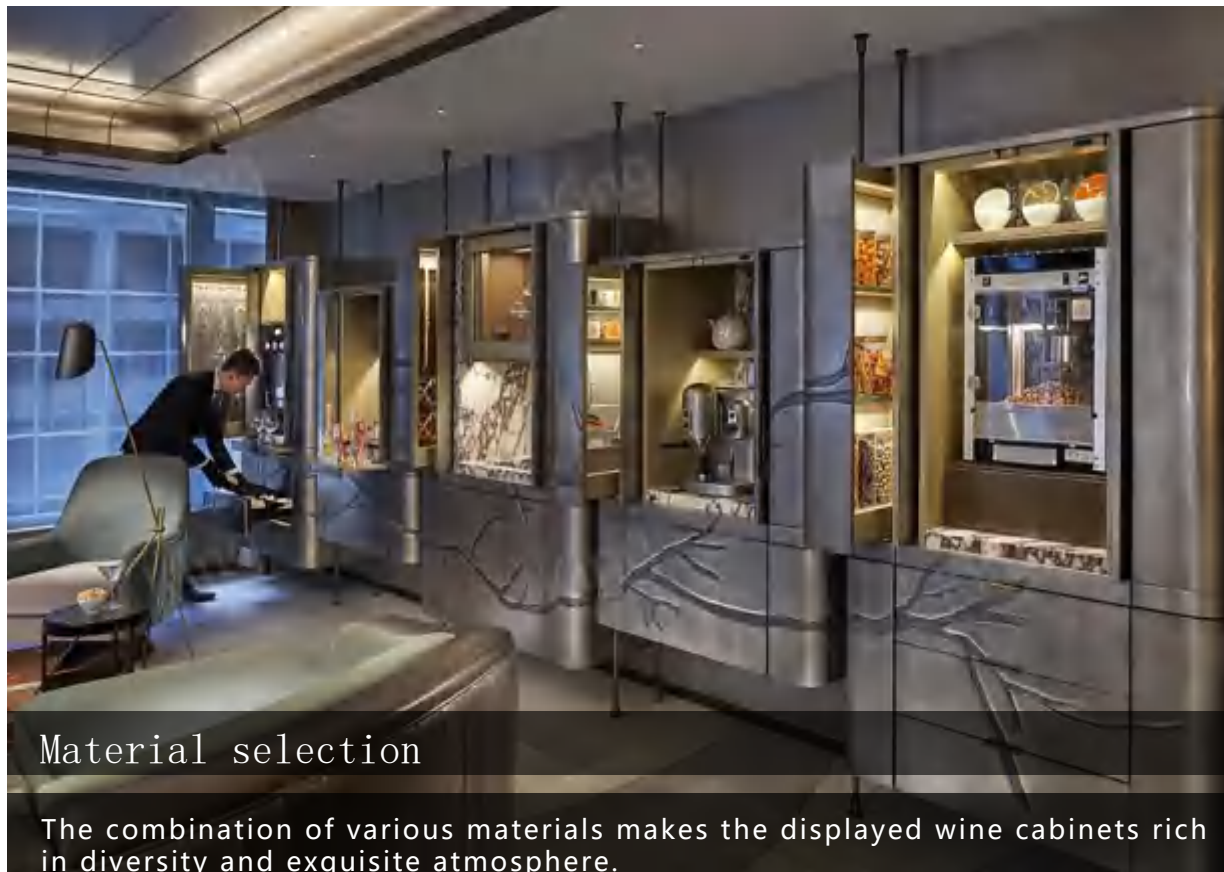

Address: Hong Kong,  
China Land Area: about 3.7  
m<sup>2</sup>

Material: Metal, Oakwood

### Three-dimensional breakdown

## Material selection

The combination of various materials makes the displayed wine cabinets rich in diversity and exquisite atmosphere.

Hairline brass

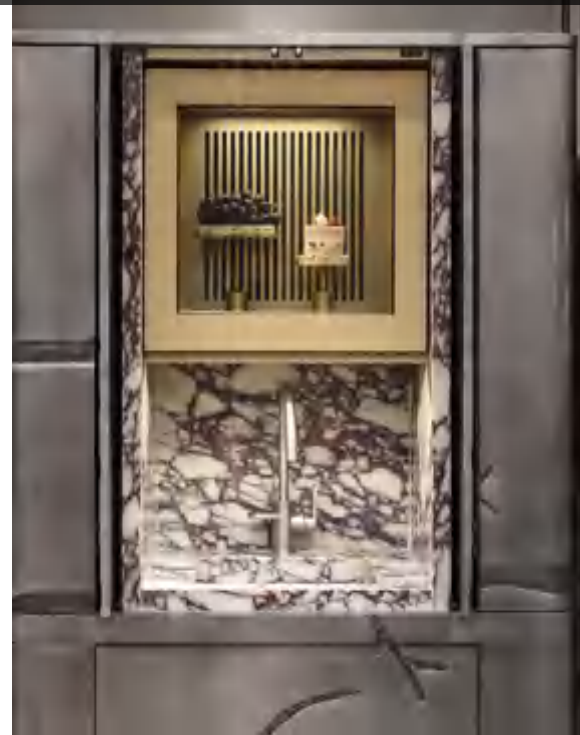

Natural Oakwood

Natural cork

Oakwood Sandcastle

Hairline black stainless steel

The flowing metal plate effect shows the beauty of warm modern lines, which makes the design of the whole wine cabinet unique and delicate.

## Show details

"Contemporary wine cellars tend to explore in diversity. The owner not only cherishes the special forms of wine, but also cherishes spirits, cigars, accessories and artworks..."

# Suzhou Winery Project

---

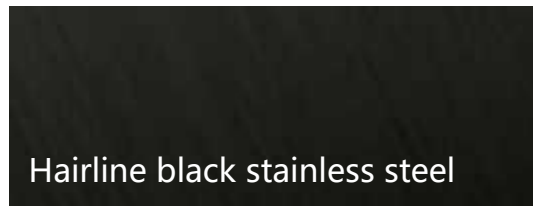

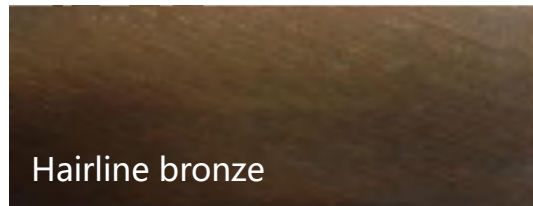

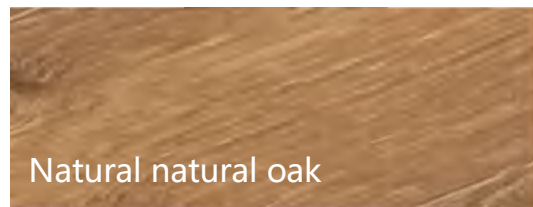

S U Z H O U

## Project information

The decoration style of the Suzhou winery is simple and atmospheric, warm and textured, so that people can relax in it. Through the interior decoration of lighting, decorations, wine display, tasting bar, etc., it presents a fashionable and comfortable atmosphere.

Address: Suzhou, China  
Area: about 12 square meters  
Material: metal, natural oak

## Material selection

The decoration style of the winery is simple and stylish, and the raw oak is combined with stainless steel in the selection of materials.

Hairline black stainless steel

whole cabinet Pulling

The high-quality hardware guide rails provide the wine cabinet good load-bearing performance, and the smooth drawing experience also adds a lot to the vine cellar.

## More project cases

---

C O M P A N Y    P R O F I L E

### Project information

The villa adopts a simple European-style light luxury decoration style, the theme color is elegant white + golden lines; therefore, the wine cabinet in the style and color selection, refer to and follow the overall decoration style, so that the wine cabinet is integrated into the overall Go in space.

Address: Sihanoukville,  
Cambodia Area: about 3  
m<sup>2</sup>

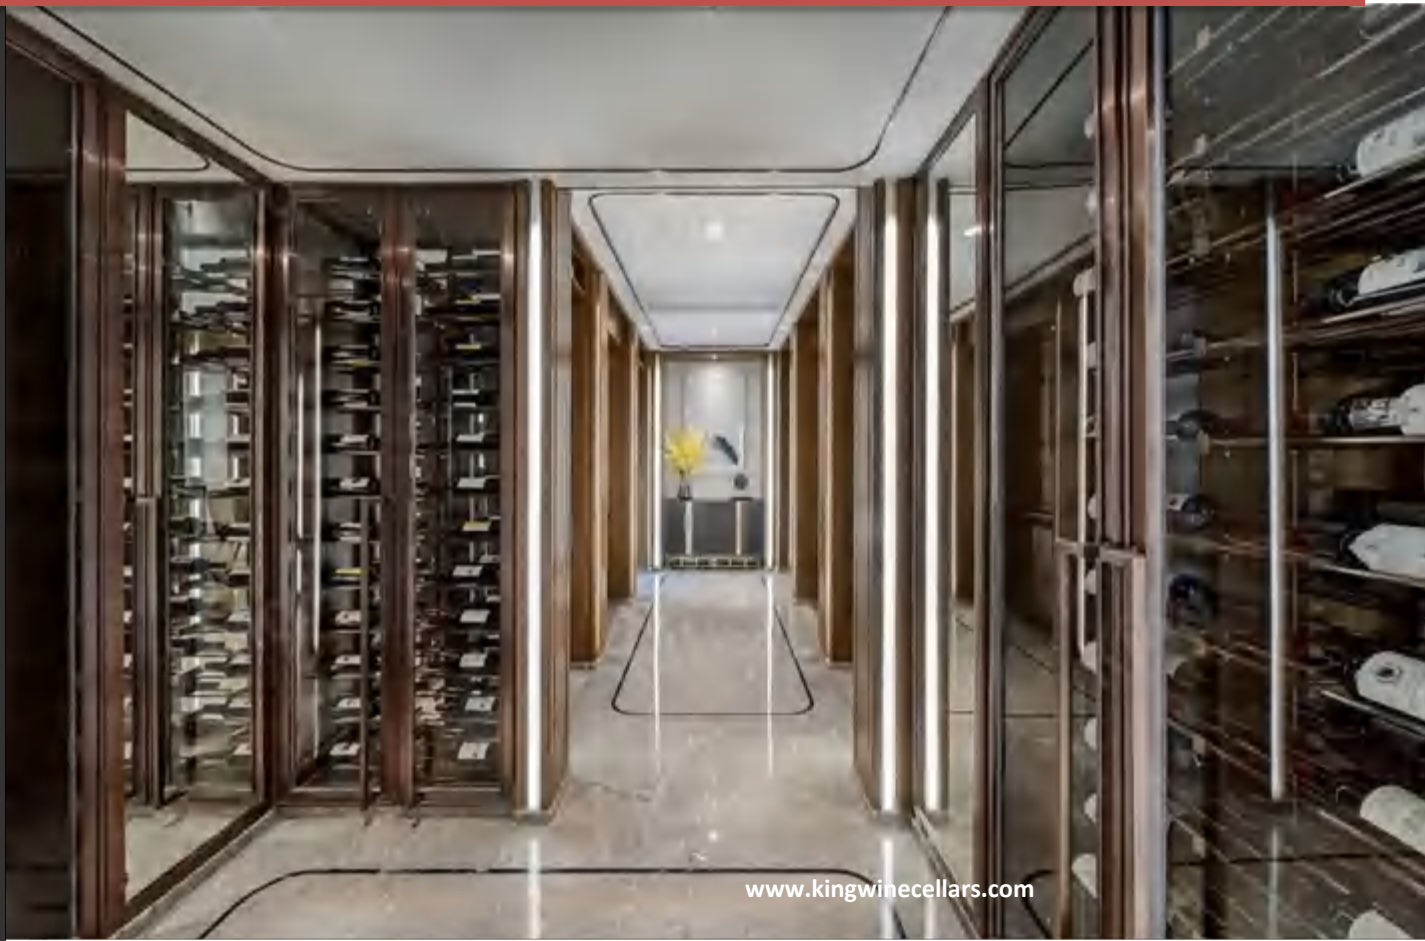

Material: metal, natural  
oak

### Project information

The overall decoration style of this winery clubhouse is modern. The wine cabinet design is simple and atmospheric and focuses more on displaying the variety and storage of a variety of red wines. The display method is mostly square. The mirror stainless steel inside the wine cabinet makes the interior space of the wine cabinet It looks more transparent.

Address: Chengdu,  
Sichuan, China Area:  
Approximately 4.5 m<sup>2</sup>  
Material: metal, natural  
oak

### Project information

The owners are young people who like to pursue fashion and require special elements to be added to the wine cellar design. Therefore, the designer adds more fresh colors and shapes to the cabinet design and lighting selection.

---

Address: Shanghai,  
China Area: about 15  
square meters  
Material: metal,  
marble
