## Company Profile

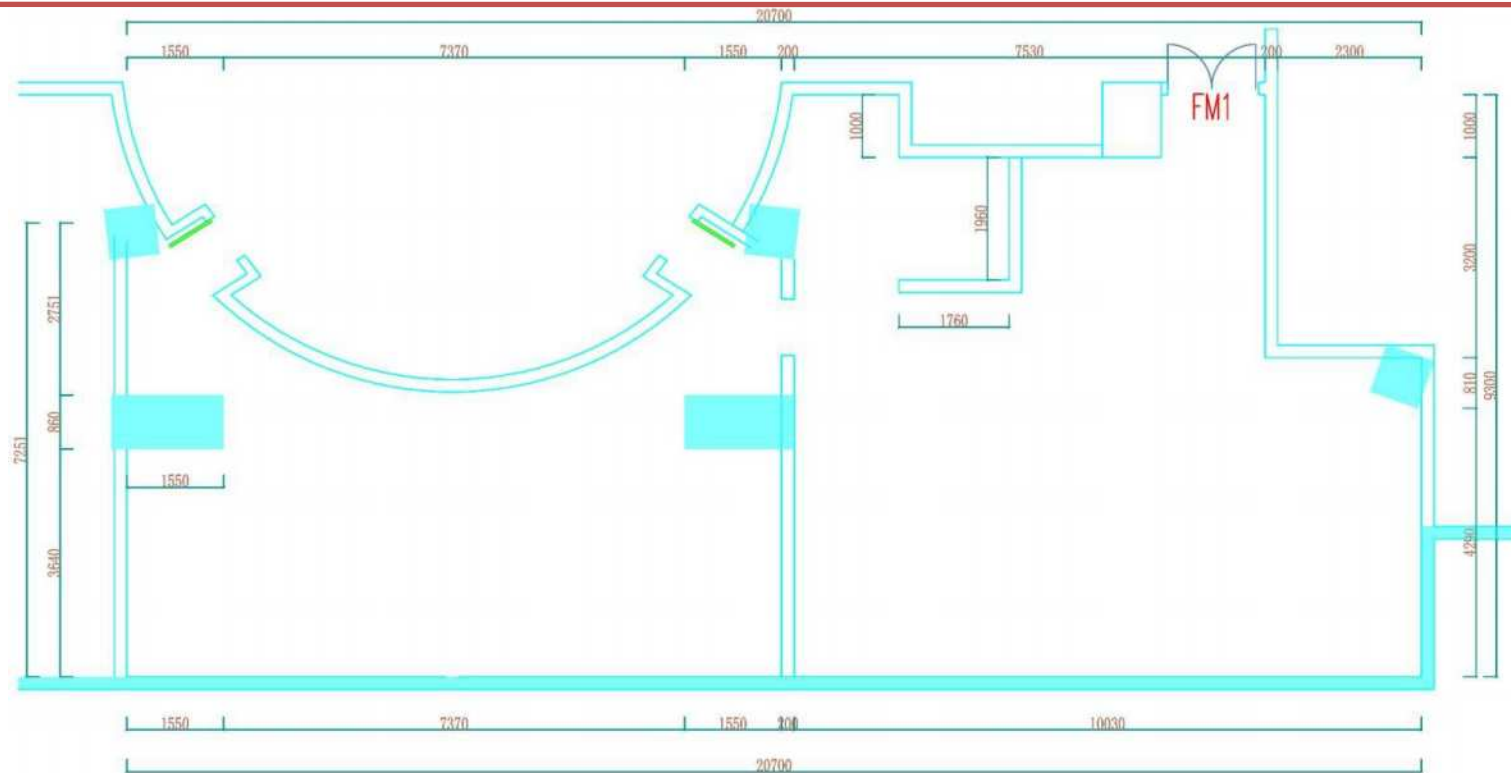

King Wine Cellar has been in the field of metal wine cellar customization for 16 years and is a leader in China's metal wine cellar innovation. The brand is committed to the use of metal to restore the original European and American wine storage environment. On the basis of retaining the original characteristics, it continues to innovate and optimize to improve the visual sense and user experience of the wine cabinet.

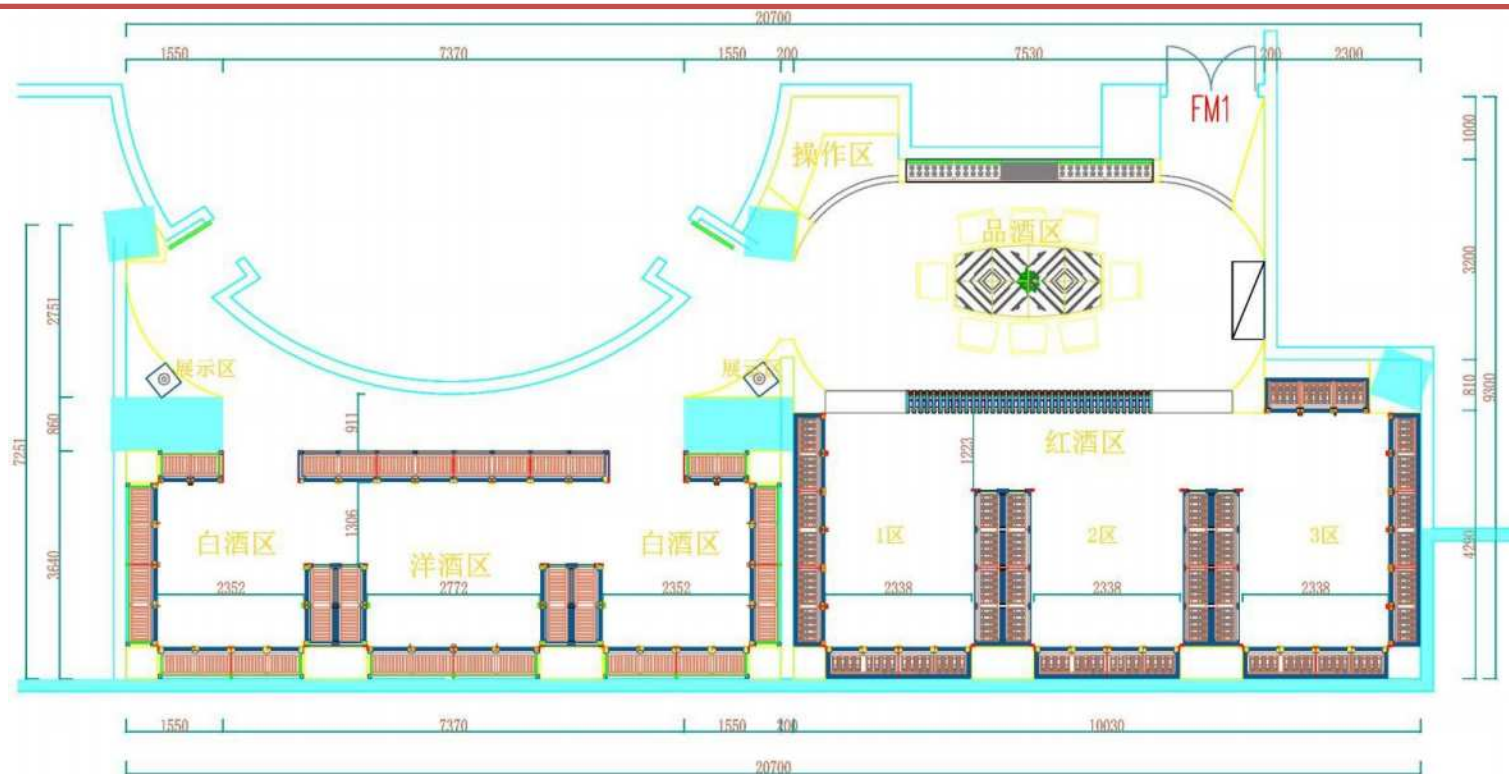

King wine cabinet inherits the excellent essence of wine cabinet design in the old world of France, Italy and Spain, and inherits the art; it integrates the fresh joy of wine cabinets in Australia, Chile, the United States, and South Africa.

King Wine Cabinet can design for our customers or take designs from customers and manufacture for them. We are committed to create modern and long life high end wine cellars for our customer.

详细技术要求说明:

1. 温度范围: 12°C - 22°C;
2. 制冷方式: 强制加热一体机 (1个);
3. 酒柜外箱, 外箱采用优质不锈钢;
4. 酒柜内箱, 均采用优质不锈钢;
5. 玻璃门: 中空钢化透明玻璃加热 (4+22A+4)MM。

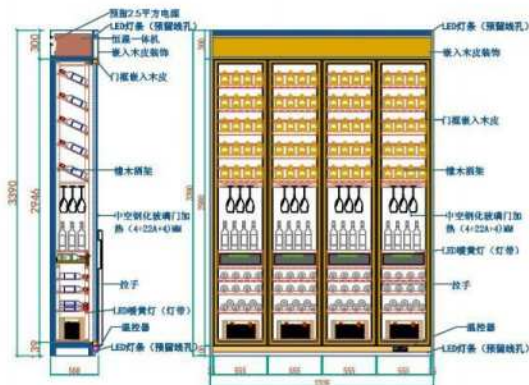

6. 面板: 采用橡木饰面 (棕色);
7. 额定电源: 220V/50HZ, 电源预留铜排预留;
8. 酒柜内部安装LED灯 (暖黄光);
9. 柜体内外及嵌装无缝, 可无缝无焊点, 密封无隙, 各个部位保固性能, 门无变形玻璃无划痕, 表面经无尘化处理。

酒柜技术要素说明:

1. 酒度范围: 12° - 22° C;
2. 储藏方式: 螺旋扣第一排扣 (5合)
3. 酒柜外观: 外部采用优质不锈钢
4. 酒柜内容: 均采用优质不锈钢
5. 玻璃门: 中空钢化透明玻璃加热 (4+22A+4MM)

6. 酒柜: 采用橡木酒架 (棕色);
7. 酒柜电源: 220V/50HZ, 电源开关控制顶部;
8. 酒柜内部安装LED灯 (暖黄光)
9. 柜体内外及酒架无钉帽, 可见面无焊点, 密封无隙缝, 各个部位做圆角处理, 门无变型玻璃无划痕, 表面做无指纹处理。

## The King Wine cellar Advantages

### ◀ Three-layer hollow heated glass

Three-layer hollow insulation glass + heating anti-fog treatment Most of the wine cabinet insulation glass doors on the market use double-layer hollow glass, so you can often see that many wine cabinet doors will have condensation or white fog, so add The German wine cabinet adopts three-layer middle insulation glass, and adds heating anti-fog treatment to make the insulation effect better and effectively prevent condensation

## The King Wine cellar Advantages

### ◀ Special imported low temperature lighting

Special low-temperature lighting for wine cabinets.

Generally, the lights used in wine cabinet factories are ordinary LED lights. Ordinary lamp beads will generate a large amount of heat after a long time, which will seriously affect the quality of the wine. Our wine cabinet uses the Seoul Semiconductor SSC brand, 3014; 8mm wide, 120 beads/m;

510Ω; 3000K; The advantages are: 1,4W/m, the heat is very small, which is more conducive to wine storage; 2. The lamp beads are controlled according to the TV light source design and control from the chip to the package; 3. FPC Special design, smaller impedance; 4. Thermal conductive tape has stronger tensile strength and meets heat dissipation requirements; 5. Warranty time is 30000H, light decay does not exceed 30%, color rendering index  $\geq 90$
